

```
1. var app = new Vue({
2.   el: '# form',
3.   filters: {
4.     selectValidator: function (val) {
5.       this.validation.selected_id = !! val
6.       return val
7.     }
8.   },
9.   data: {
10.    form: {
11.      selected_id: ""
12.    },
13.    validation: {
14.      selected_id: false
15.    }
16.  },
17.  methods: {
18.    updateForm: function (e) {
19.      console.log(this.validation.selected_id)
20.      if (this.validation.selected_id) {
21.        console.log("make ajax call")
22.      }
23.    }
24.  }
25. })
```

html

```
1. <div id= 'form' v-on= "change:updateForm">
2.   <form>
3.     <select id= "selects" name= "selected_id" v-model= 'form.selected_id | selectValidator'>
4.       <option value= "">Please choose one
5.       <option value= '1'>Select 1</option>
6.       <option value= '2'>Select 2</option>
7.     </select>
8.   </form>
9.   <br>
10. <div v-show= "!validation.selected_id">Select cannot be blank</div>
11. <div v-show= "validation.selected_id">{ { form.selected_id } } </div>
```

12. `<div v-show= "validation.selected_id">{{ validation.selected_id}} </div>`

13. `</div>`
